PROFESSIONAL SUMMARY

ARCON-certified Cybersecurity Analyst with 2.5 years delivering Privileged Access Management (PAM) implementations and security operations for banking, government and cloud-hosting clients in the UAE and India. Certified at Administrator, Professional and Associate level in ARCON PAM with two years administering the platform in production. Responsible for end-to-end delivery of deployments covering 2,000+ servers at Abu Dhabi Islamic Bank and 750 endpoint users at MoroHub, spanning password vaulting, just-in-time and time-bound access, session video logging and Production/DR/UAT rollouts. Skilled in SIEM monitoring, vulnerability assessment and firewall investigation. Currently completing an MSc in Cybersecurity and Machine Learning at Aberdeen; eligible for the UK Graduate Route.

CORE SKILLS

Security Operations: SIEM monitoring and alert triage, threat detection, incident investigation, log analysis, vulnerability assessment, firewall administration, NIST Cybersecurity Framework, incident response lifecycle

Identity & Access Management: ARCON PAM (Administrator / Professional / Associate certified), password vaulting, automated password rotation, just-in-time, time-bound and permanent access provisioning, privileged session monitoring and video recording, account freeze / suspension, PAM connectors, SAML federation, MFA, endpoint privilege management (EPM), least-privilege, RBAC, Active Directory

Platforms & Programming: Windows Server, Linux (CentOS), IIS, MS-SQL Server, MySQL, secure gateway / VPN servers, AWS, Oracle Cloud Infrastructure (OCI), high-availability and DR environments, Python, C, C++, SQL, Power BI, machine learning fundamentals for security analytics

PROFESSIONAL EXPERIENCE

Security Analyst — Arcontech Solutions Pvt Ltd

July 2023 – December 2025

Mumbai, Maharashtra, India | Cybersecurity solutions and systems integration

- Responsible for end-to-end delivery of ARCON Privileged Access Management (PAM) for major regional clients including Abu Dhabi Islamic Bank, MoroHub, eHosting DataFort and ADQCC, from installation through go-live and handover across estates of up to 2,000+ servers.
- Managed full-stack ARCON PAM infrastructure end to end: configured MS-SQL databases, deployed web applications on IIS across Windows Server, implemented secure gateway (VPN) servers on CentOS, and integrated PAM with Active Directory, SAML federation and MFA.
- Executed daily Security Operations tasks including continuous threat monitoring, alert triage and in-depth investigation using SIEM and firewall tooling, plus recurring vulnerability assessments with system owners to prioritise and validate remediation.
- Acted as primary technical contact for client stakeholders, resolving critical issues under tight timelines and producing runbooks and handover documentation enabling client teams to operate PAM independently.

KEY PROJECTS

PAM Deployment — Abu Dhabi Islamic Bank

January 2025 – March 2025

Abu Dhabi, United Arab Emirates | Banking and financial services

- Deployed ARCON PAM across 2,000+ servers, implementing Password Vault and Web Log modules in Production, DR and UAT environments under strict regulatory requirements.
- Configured a tiered access model covering one-time (just-in-time), time-bound and permanent access, with per-server entitlement mapping, administrator freeze / unfreeze controls, automated password rotation and video session logging for a tamper-evident audit trail.
- Built centralised dashboards surfacing password rotation and expiry alerts, live session counts and real-time visibility of servers being accessed; sustained delivery across a three-month phased migration onboarding users in controlled waves without disrupting banking operations.

PAM Deployments — MoroHub, eHosting DataFort & ADQCC

United Arab Emirates, 2023 – 2025

- Delivered an ARCON PAM implementation covering 750 endpoint users at MoroHub with granular server entitlements, time-bound access approvals, video session logging and monitoring dashboards; ran further rollouts for a cloud provider and a government entity covering environment sizing, MS-SQL setup and IIS deployment.

EDUCATION

MSc Cybersecurity and Machine Learning — University of Aberdeen

Jan 2026 – Expected May 2027

Aberdeen, Scotland, United Kingdom | 16-month programme, completing May 2027

BE Mechatronics Engineering — Ajeenkya DY Patil College, Pune

Aug 2019 – May 2023

Pune, Maharashtra, India | First Class with Honours

CERTIFICATIONS

ARCON University: PAM Administrator • PAM Professional • PAM Associate • Converged Identity Fundamentals • MFA • PAM Connectors and SAML • Endpoint Privilege Manager (all 2025)

Other: Google Cybersecurity Professional Certificate • Ethical Hacking (Cisco) • Introduction to Cybersecurity (Cisco) • Fundamentals of Networking

Work Authorisation: UK Student visa with permitted work rights; Graduate Route eligible on completion. Valid Oman driving licence. Available in the UK, UAE and Oman.
